

Can & Bottle Filler, Lidder & Closer

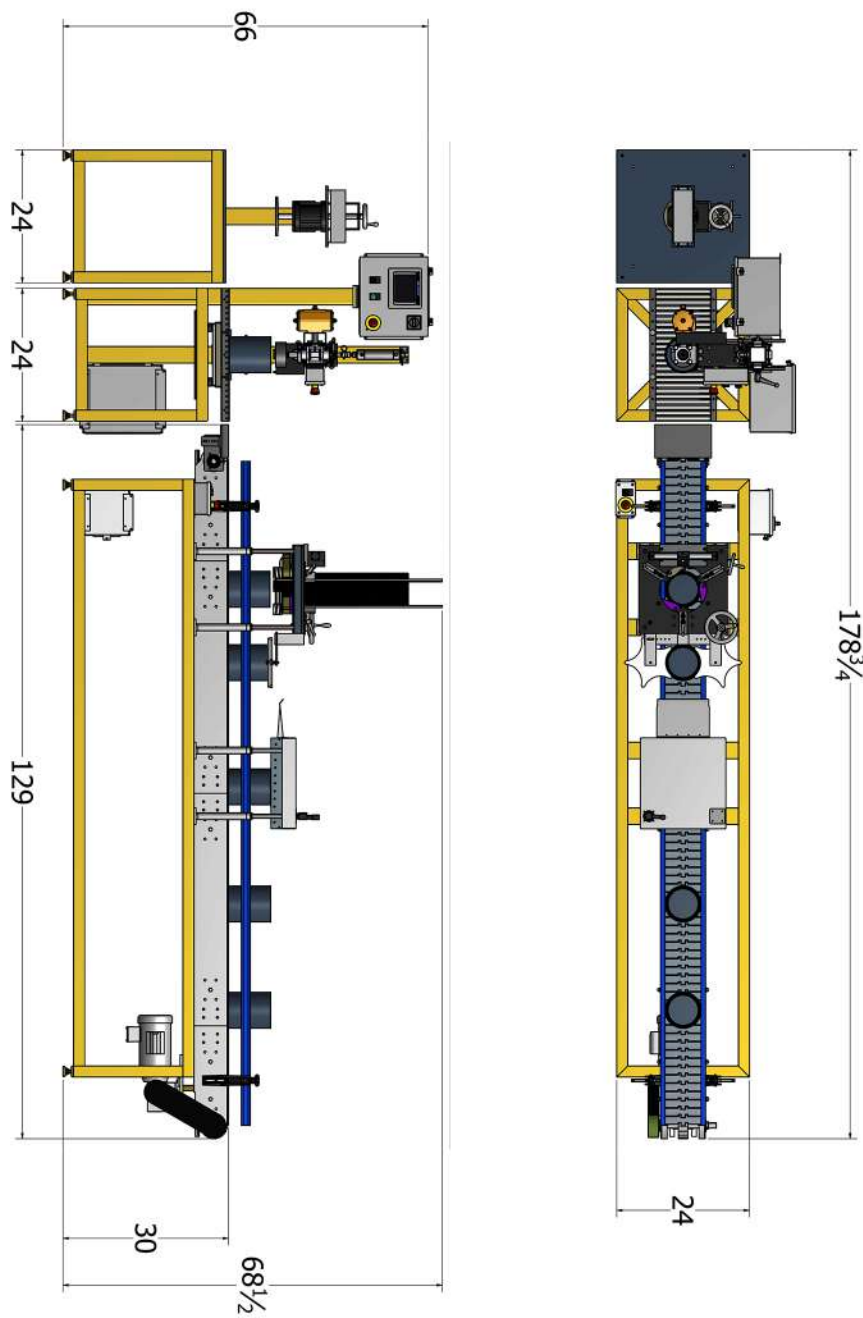

Kinesys Automation introduces a versatile processing line for cans and bottles!

Kinesys Automation introduces its latest addition to flexible filling, highlighting the versatility of filling and processing cans and bottles on a single line. Using a standalone filler featuring interchangeable valves and nozzles, with a standalone pressure closer and a standalone lid dropper/roller closer, Kinesys Automation has once again demonstrated the benefits of modular automation.

- Features interchangeable and self calibrating scales.
- Features interchangeable valves and nozzles.
- Accommodates sub-surface filling.
- Features tool-less changeovers.
- Optionally available for explosion proof applications.

When having difficulties in your assembly or manufacturing process, contact Kinesys Automation for more information about a field proven solution.
